

Broadway and Moston Lane East Junction Crossing Improvements.

This plan shows the changes to the junction of Broadway and Moston Lane East, designed to make the area safer for pedestrians to cross. The improvements include:

- Controlled crossings at each arm of the junction
- A new pedestrian refuge island on the north-eastern arm of the junction
- Relocating two bus stops further back from the junction entrance on both sides of Moston Lane East
- Double Yellow Lines to prevent parking on the corners of the junction and on the approach to the junction, to stop issues with parked vehicles blocking line of sight
- An uncontrolled crossing point across the entrance to the row of shops on the southeast corner of the junction
- Bollards to prevent pavement parking

Key

- Footway surfacing
- Carriageway surfacing
- Paved area for bus stop platform
