

Notes

1. This movement document meets the reporting requirements of:
 - the Sheep and Goats (Records, Identification and Movement) (England) Order 2009 (SAGRIMO); and
 - Article 4 of Council Regulation (EC) No.1/2005 on the welfare of animals during transport and related operations which requires transporters to carry documentation, referred to in the United Kingdom as an Animal Transport Certificate, recording the origin and ownership of the animals, place of departure and destination and certain information allowing journey times to be checked and assessed.
2. All fields on the movement document must be completed to comply with paragraph 1 above.
3. It is the CPH of the premises from which the animals are departing, and to which they are travelling, that must be recorded on the form. The address must accurately reflect where the animals are moving from and travelling to.
4. This document serves as a **single** movement reporting document. Each stage of a multiple move must be completed on a separate movement reporting document.

This document may be retained by keepers as an alternative to completing records of OFF movements in their holding registers.

5. Where Section 1 has not been completed by the keeper at the departure holding, these details must **not** be completed by the keeper at the destination holding. Local Authorities will contact the departure holding for clarification of the details to be entered into Section 1.
6. Other requirements relating to the movement of sheep and goats are contained in the Disease Control (England) Order 2003 (as amended) and the General Licence for the Movement of Sheep and Goats. Details can be found at <http://www.defra.gov.uk/foodfarm/farmanimal/sheepgoats/idmovement.htm>
7. Copies of this form can be found at <http://www.defra.gov.uk/corporate/docs/forms/health/aml/aml1.htm> or available from Local Authorities.
8. The keeper at the destination holding must keep a copy of this movement document for 3 years.
9. Expected duration of journey is from the time the first animal is loaded at the place of departure until the time the last animal is unloaded at the place of destination including any rest times or stops for any other purpose en route.

Food Chain Information (FCI)

- Sheep and goats on the holding are not under movement restrictions for animal disease or public health reasons (excluding any 6 day standstill).
- Withdrawal periods have been observed for all veterinary medicines and other treatments administered to the animals while on this holding and previous holdings.
- To the best of my knowledge the animals are not showing signs of any disease or condition that may affect the safety of meat derived from them.
- No analysis of samples taken from animals on the holding or other samples has shown that the animals in this consignment may have been exposed to any disease or condition that may affect the safety of meat or to substances likely to result in residues in meat.

Additional FCI

Information about animals showing signs of a disease or condition that may affect the safety of meat derived from it/them.	
Identification of animal(s) – or attach list	
Describe the disease or condition, or diagnosis if a veterinary surgeon has examined the animal(s)	
Withdrawal periods have been observed for all veterinary medicines and other treatments administered to the animals while on this holding and previous holdings.	
Information about holding restrictions or results of analysis of samples relevant to public health.
