

Five Year Housing Land Supply Statement:

Analysis of Strategic Housing Land Availability Assessment Data

Base date 1 April 2019

#### 1. Introduction

- 1.1 The government has an objective of significantly boosting the supply of housing. In order to maintain supply and delivery of housing, paragraph 73 of the 2019 National Planning Policy Framework (NPPF) requires Local Planning Authorities (LPAs) to identify and update annually a supply of specific deliverable sites sufficient to provide five years' worth of housing against their housing requirements with an additional buffer of 5%, 10% or 20% depending on local circumstances.
- 1.2 Having regard to paragraph 73 of the NPPF, in order to identify whether there is a five year housing land supply it is necessary to:
  - 1) Identify the housing requirement for the five year period
  - 2) Identify the appropriate buffer
  - 3) Identify the scale of housing that it is estimated will be delivered over the next five years
  - 4) Calculate whether the identified supply of housing is sufficient to meet the five year requirement with the appropriate buffer
- 1.3 The latest identification of the five-year housing land supply in Manchester has a base date of 1 April 2019 and covers the period up to 31 March 2024. The <a href="SHLAA">SHLAA</a> is published by the City Council and on the GMCA website, <a href="MappingGM">MappingGM</a>.
- 1.4 Analysis of the identified supply has been carried out in line with National Planning Policy Framework February 2019 and Planning Practice Guidance published at the time of writing (March 2020).

## 2. Five year housing requirement

#### **Background**

2.1 The first part of paragraph 73 of the NPPF requires that:

"Local Planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old"

- 2.2 Local housing need' is defined in Annex 2 of the NPPF as: "The number of homes identified as being needed through the application of the standard method set out in national planning guidance (or, in the context of preparing strategic policies only, this may be calculated using a justified alternative approach as provided for in paragraph 60 of this Framework)"
- 2.3 Manchester's current Local Plan, the Manchester Core Strategy, was adopted over 5 years ago therefore, the requirement for the purposes of calculating whether there is a five year supply is based on local housing need in line with the methodology set out in national planning practice guidance.

#### **Current local housing need**

2.5 The Government's national planning practice guidance explains that the standard method to calculate a minimum annual local housing need figure is as follows:

#### Step 1 - Setting the baseline

Set the baseline using national household growth projections (2014-based household projections in England, table 406 unitary authorities and districts in England) for the area of the local authority. Using these projections, calculate the projected average annual household growth over a 10 year period (this should be 10 consecutive years, with the current year being used as the starting point from which to calculate growth over that period)

#### Step 2 – An adjustment to take account of affordability

Then adjust the average annual projected household growth figure (as calculated in step 1) based on the affordability of the area.

The most recent median workplace-based affordability ratios, published by the Office for National Statistics at a local authority level, should be used.

No adjustment is applied where the ratio is 4 or below. For each 1% the ratio is above 4 (with a ratio of 8 representing a 100% increase), the average household growth should be increased by a quarter of a percent. To be able to apply the percentage increase adjustment to the projected growth figure we then need to add 1.

Where an adjustment is to be made, the precise formula is as follows:

$$Adjustment\ factor = \left(\frac{Local\ affordability\ ratio\ -4}{4}\right)x\ 0.25$$

#### Step 3 - Capping the level of any increase

A cap is then applied which limits the increases an individual local authority can face. How this is calculated depends on the current status of relevant strategic policies for housing.

Where these policies were adopted within the last 5 years (at the point of making the calculation), the local housing need figure is capped at 40% above the average annual housing requirement figure set out in the existing policies.

This also applies where the relevant strategic policies have been reviewed by the authority within the 5 year period and found to not require updating.

For areas covered by spatial development strategies, the relevant strategic policies are those contained within the spatial development strategy. For example, where a requirement figure for an authority in a spatial development strategy differs from that in a local plan, the figure in the spatial development strategy should be used.

Where the relevant strategic policies for housing were adopted more than 5 years ago (at the point of making the calculation), the local housing need figure is capped at 40% above whichever is the higher of:

- a. the projected household growth for the area over the 10 year period identified in step 1; or
- b. the average annual housing requirement figure set out in the most recently adopted strategic policies (if a figure exists).
- 2.6 Having regard to the guidance, the baseline has been set using the projected annual household growth over a 10 year period using the 2014-based household projections, with 2019 being the first of the ten years given that the five year supply period being considered within this report is for the period 2019 to 2024. The relevant ONS median workplace based affordability ratios for Manchester at 28 March 2019 were for 2018. As Manchester does not have an adopted strategic policy setting out a housing requirement, guidance around capping the local housing need figure is not applicable.
- 2.7 Taking into account the above, the local housing need figure for Manchester is set out in Table 1:

Table 1: Local Housing Need

| Variable  |         |
|---|---------|
| Manchester 2019-2029 household increase   | 23566   |
| Manchester local affordability ratio (2018 median house price to median workplace earnings) | 5.74    |
| $Adjustment\ factor = \left(\frac{Local\ affordability\ ratio\ -4}{4}\right)x\ 0.25$        | 0.10875 |
| Local housing need 2019-29 = (1+ adjustment factor) x                                       | 26129   |
| (projected household growth 2019-29)  |         |
| Local housing need per annum  | 2613    |

2.8 Applying the local housing need figure of 2613 per annum shown above to the five year period 2019 to 2024 would produce a requirement of 13065 dwellings.

## 3. Supply buffer and requirement

3.1 The second part of Paragraph 73 of the NPPF states that:

"The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:

- a) 5% to ensure choice and competition in the market for land; or
- b) 10% where the Local Planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or
- 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply

- 3.2 The City Council, has not demonstrated a five year supply of deliverable sites through an annual position statement or a recently adopted plan in accordance with paragraph 73b. Therefore, a 10% buffer is not applicable.
- 3.3 With regard to paragraph 73c, on 13 Feb 2020 MHCLG published the Housing Delivery Test: 2019 results which showed Manchester had delivered 100% of the required housing over the past three years. Therefore a 20% buffer is not applicable.
- 3.4 As neither 73b or 73c apply Manchester is required to add a 5% buffer to its housing need figure in line with 73a.

#### Housing requirement with buffer

3.5 Using the identified requirements outlined in section 2 of this report, Manchester's housing need requirement over the period 2019 to 2024 with an additional 5% is 2,744 per annum or 13,718 in total.

# 4. Supply of deliverable sites between 1 April 2019 and 31 March 2024

- 4.1 Manchester carried out its 2019 Strategic Housing Availability Assessment (SHLAA) between April and June 2019. The <u>SHLAA</u> is published by the City Council and on the GMCA website, <u>MappingGM.</u>
- 4.2 The definition of deliverable in the National Planning Policy Framework (Annex 2 Glossary) is:-

"To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:

- a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).
- b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.

- 4.3 Annex 1 to this document shows a full list of all schemes considered deliverable at 31st March 2019. As the above definition is deemed to be a closed list, any site without permission in the SHLAA that is not included on the Brownfield Land Register has not been included.
- 4.4 At the base date of 1 April 2019, the five-year supply of specific deliverable sites totals 23,544 net additional dwellings. This consists of:
  - Units under construction 12,686
  - Units with full planning permission 4,734
  - Units with outline planning permission 54 (40 on minor schemes only)
  - Units without permission but considered deliverable (clear evidence available) – 6070

#### **Demolitions**

- 4.5 Annex 1 takes into account residential units lost to other development and residential units lost as part of a conversion. It does not list demolitions expected as part of a redevelopment scheme. A total of 95 demolitions are expected in the next five years through redevelopment schemes. From 2014/15 to 2018/19 an average of 45 demolitions were recorded that were unexpected (i.e. not part of a redevelopment scheme).
- 4.6 A reduction of 320 units (45 units per year plus 95), therefore, has been made to the 5 year land supply figures. The final 5 year supply land figures therefore are:-
  - Full five year supply 23,224 units
  - Five year supply on sites under construction; with full planning permission or outline planning permission (minor schemes) – 17,140 units

#### Assumptions for start date and build out rate

- 4.7 For major schemes (10+ units) with planning permission and/or an identified developer partner have been allocated an expected start on site date based upon timescales received directly from developers. These are reviewed on an ongoing basis as new intelligence is received.
- 4.8 Once a start date is established, for major schemes where the entirety of the development / phase is expected to complete at the same time (primarily

- apartment led schemes), the expected year of completion is allocated based on the timescales received directly from developers (where available) or the average build period for a similar scale/type of development.
- 4.9 Where major schemes that are expected to record completions across more than one financial year (traditional housing schemes or mixed developments), annual completions are forecast based on the timescales received directly from developers (where available) or the average annual build rate across similar schemes in that locality or within the developers existing portfolio of sites. Build out rates are therefore considered on a scheme by scheme basis rather than any general assumptions applied.
- 4.10 It has been assumed that sites with planning permission for minor schemes (under ten units) at 1 April 2019 will be completed in 2020/21 year. However, delivery has been assumed to be 2019/20 if the Council has reason to believe schemes will be completed sooner (i.e. they are under construction by 1 April 2019). These assumptions would not be applied if the Council has been given specific information (e.g. delivery has been agreed with a registered provider).
- 4.11 Minor schemes are assumed to be completed within one year.

# 5. Manchester's five year housing land supply position

- Having regard to the calculated requirement (including an allowance for a 5% buffer) and to the five-year supply of deliverable sites identified in Annex 1 the five-year land supply position in Manchester over the period 1 April 2019 to 31 March 2024 has been assessed.
- 5.2 As Manchester has a strong pipeline of schemes with full planning permission, the 5 year supply position has been assessed considering:-
  - Schemes in Annex 1 with full permission and outline permission for minor schemes and
  - b) All schemes in Annex 1

The results of the assessment are shown in Table 2.

Table 2: Assessment of five year supply

|     |  | Net                                 | additional dwel                | lings              |                                     |
|-----|--|-------------------------------------|--------------------------------|--------------------|-------------------------------------|
| Ass | sessment   | 2019-2024<br>Supply of<br>dwellings | 2019-2024  Requirement with 5% | Annual requirement | Number of years supply <sup>1</sup> |
| a)  | Schemes in Annex 1:-  • that are under construction  • with full planning permission  • with outline planning permission (minor schemes only) (N.B adjusted for demolitions) | 17,140                              | 13,718                         | 2,744              | 6.25                                |
| b)  | All schemes in<br>Annex 1 (adjusted for<br>demolitions)  | 23,224                              | 13,718                         | 2,744              | 8.46                                |

#### Conclusion of 5 year supply assessment

5.3 The assessment shown in Table 2 demonstrates that, even when considering only schemes with full planning permission, Manchester has over five years supply of deliverable housing sites.
