## MAKING MANCHESTER FAIRER

Tackling Health Inequalities in Manchester 2022–2027

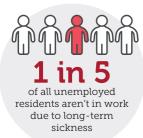

#### **WE KNOW THE FACTS...**

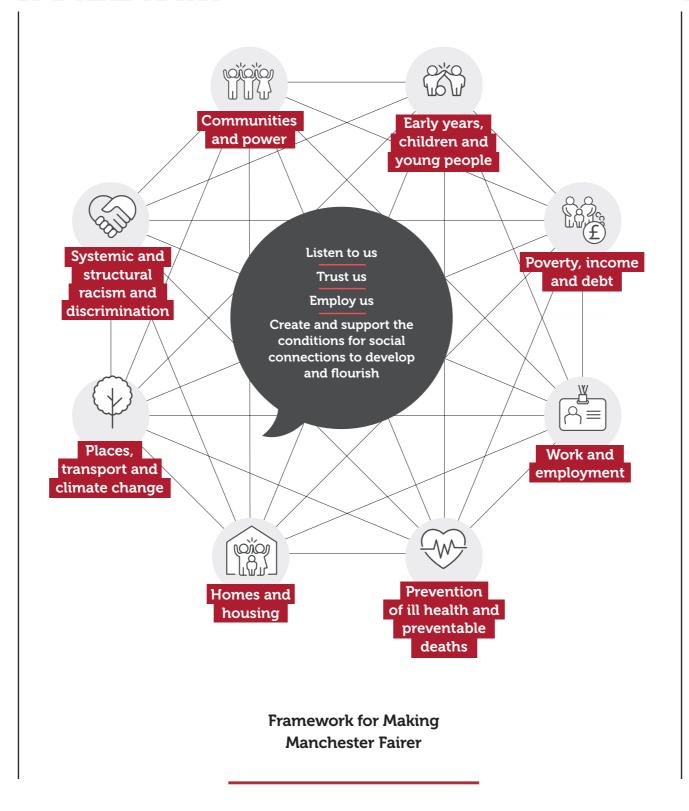

Nearly half (48%) of all confirmed cases of COVID-19 between March 2020 and March 2022 were people from Black, Asian and Minority Ethnic communities

On average, over half of all early deaths from heart disease, cancers and lung diseases in Manchester could have been prevented

### IT'S TIME TO ACT.

#### **LEADING TO**

Increased life expectancy in the most disadvantaged areas of the city compared with the least disadvantaged areas.

Fewer preventable deaths from heart disease, lung diseases, stroke and cancer.

Reducing the number of children living in poverty.

More good jobs and employment for Manchester residents.

More Manchester residents and communities having an influence on things that affect their health.

# MAKING MANCHESTER FAIRER

### **OUR SIX PRINCIPLES**

1

Focus on what we need to do to achieve equity 2

Respond to and learn from the impact of COVID-19 3

Tailor to reflect the needs of Manchester

4

Collaborate creatively with a whole system approach 5

Monitor to make sure we're 'making Manchester fairer' within Manchester as well as narrowing the gap between Manchester and regional or national averages 6

Take a life course approach, with action on health inequalities starting before birth and right through to a focus on ageing and the specific needs of older people
