

Delegated Approval for Alterations to the Highway

To: Kevin Gillham
Head of Citywide Highways

From: TBC
Head of Design
Commissioning & PMO

Date: 29/04/2025

Highways Planned Maintenance Programmes 2025/26

In accordance with the Council's Scheme of Delegation, which allows you to approve the alterations to the highway subject to consultation with the Executive Member for Environment, I should be grateful if you would consider the following proposals, complete the approvals form, and return it to me.

I do / ~~do not~~* approve the proposals described in the attached report for the reasons set out in the report.

13-05-2025

.....

.....
Kevin Gillham
Head of Citywide Highways

Date

Having been consulted by the Head of Citywide Highways, I do support the proposals described in the attached report.

.....
Councillor Tracy Rawlins
Executive Member for Environment & Transport

TITLE	Highways Planned Maintenance Programmes 2025/26		
WARD	All		
PROJECT SRO	Kevin Gillham	Tel no.	0161 234 5660
CONTACT OFFICERS	Paul Swann	Tel no.	0161 219 2220

1. PURPOSE

- 1.1 The purpose of the report is to gain approval for the Carriageway and Footway Programmes for 2025/26

2. BACKGROUND

- 2.1 The investment in highways since 2017 has helped to deliver on the 'Our Manchester' strategy priorities by helping to make Manchester a great place to live, with improvements in road and footway condition and drainage improvements which also aligns with objectives set out in the Greater Manchester 2040 Transport Strategy.
- 2.2 The work carried out during the investment period has resulted in the overall percentage of 'poor' condition roads in Manchester reducing from 25% in 2017 to 12% in 2024.
- 2.3 The Council has agreed that investment still needs to be carried out to sustain these improvements to Manchester's highway network.
- 2.4 The continuing priority for 2025/26 onwards is that any further investment will include a shift in approach to give an increased priority to local road & footway improvements to support active travel.
- 2.5 A programme of preventative works will be adopted as this will deliver the best value for money and will be prioritised for delivery.
- 2.6 Maintenance works will also be programmed to coordinate with other capital projects being carried out in Manchester, which will be cost effective in terms of delivery and additional value to the project.
- 2.7 The planned maintenance programmes for 2025/26 contained in this report have been developed following consultation with neighbourhood teams and local members.

3. FUNDING

- 3.1 The table below shows the indicative proposed spend on the planned maintenance programmes for 2025/26, which includes prudential borrowing, government funding (CRSTS) as well as budgets carried over from 2024/25.
- 3.2 The figures are indicative, and actual spend will be reported periodically at the Highway Maintenance Board meetings throughout the year.

<u>SAP code</u>	<u>Programme</u>	<u>Proposed budget 2025/26 (£000's)</u>
C/2416/0010/1	Large patching	496,621
C/2416/0010/2	Small patching	5,792,104
C/2416/0013	Carriageway resurfacing	6,286,119
C/2416/0014	Footway schemes	5,343,059
C/2416/0015	Carriageway preventative	2,574,431

TOTAL: 21,085,542

4. PROPOSALS

- 4.1 Details of the proposed programmes are contained in the following appendices to this report (not including any schemes carried over from previous years):
- Appendix 1 - Proposed Carriageway Resurfacing programme for 2025/26.
 - Appendix 2 – Proposed Footway programme for 2025/26.
 - Appendix 3 – Proposed Carriageway Preventative programme for 2025/26.
- 4.2 We propose to continue to use a ward-based approach for delivery of these planned programmes, so that each ward receives 2 resurfacing / footway programmes and at least 1 preventative treatment programme over a 5-year period. This means that there may be some wards that have only a few or no planned schemes in a particular year.
- 4.3 The business case for continued investment advocates prioritising our local road and footway network, whilst maintaining the good condition of our strategic roads; With this in mind, our proposed prioritisation process is primarily based on those roads in the worst condition in terms of survey rating and number of identified defects in the targeted wards, as well as other considerations, including requests, skid resistance values, accidents and if a cycle or bus route.
- 4.4 Neighbourhood teams and ward members were consulted on the proposals, and some amendments were made accordingly.
- 4.5 Works will be delivered through our existing framework contracts, to obtain best value.
- 4.6 Any amendments to the schedule will be communicated to the appropriate locality teams and local members so that they are kept informed of any changes that become necessary.
- 4.7 In addition, before starting any planned work on the highway, contractors will contact all residents and businesses who live on the street that will be resurfaced. Prior to this, the Ward members will be notified and given a copy of the letter that will be distributed to residents.
- 4.8 The approved maintenance programme will be made available on the Council's Website, and it will be regularly updated with progress.

5. TIMESCALES

- 5.1 The works proposed in this report are scheduled to be delivered during the financial year 2025/26.

6. FINANCIAL IMPLICATIONS

- 6.1 The cost of the works for 2025/26 is contained within the maintenance budget already agreed by the Council's Executive and the City Treasurer and will be the subject of Checkpoint applications.

7. IMPLICATIONS FOR KEY COUNCIL POLICIES

- 7.1 Anti-Poverty Implications

- N/A

- 7.2 Equal Opportunities Implications

- To provide a suitable and safer environment for pedestrians and other road users.

The programmes contribute to the corporate objectives of making the environment accessible to all and creating neighbourhoods of choice.

7.3 Environment Implications

- We'll encourage walking, cycling and public transport with more investment in the infrastructure needed and harness technology to improve sustainability, reduce our carbon footprint and increase climate resilience.

7.4 Employment Implications

- Providing infrastructure access for all to employment, education, healthcare, leisure and social opportunities enables people to make the most of life, supporting stronger communities.

8. RECOMMENDATIONS

8.1 It is recommended that the proposals outlined in this report be approved for the reasons set out above.

Distribution

Paul Swann:	(Team Leader, Highways)
